

Rapid testing booth

with air purification

Healthcare staff can examine the patients and take sample swabs through arm length gloves fitted in the booth walls. This helps keep workers safe, and conserving personal protective equipment (PPE) Thus reducing the PPE cost.

Reduce the need for personal protection with a filtering fan system

Reduce the post-test sterilizing process to a minute.

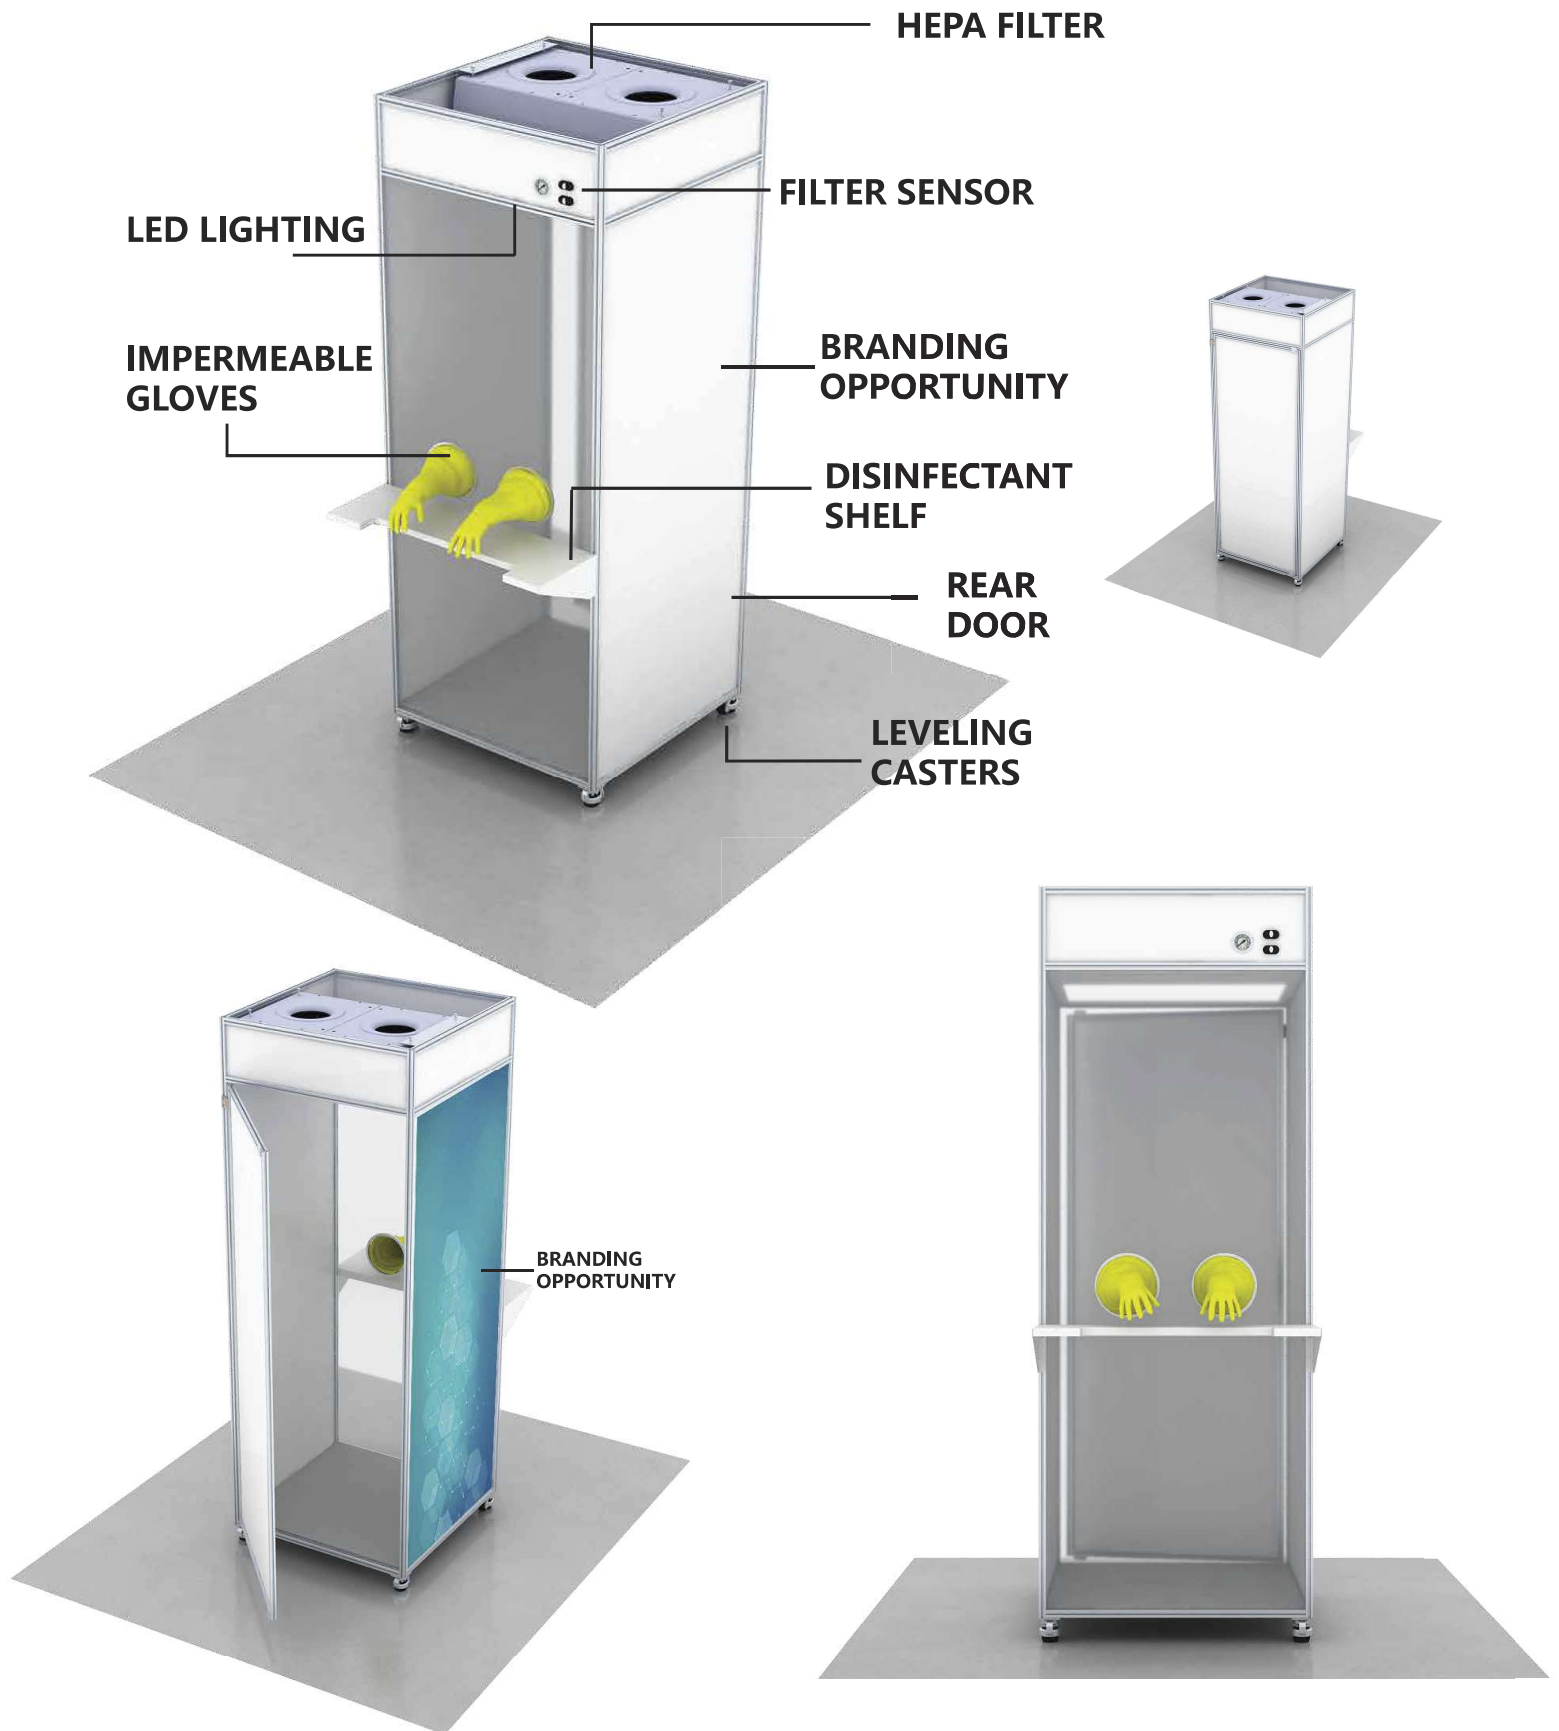

Ultimate protection for the healthcare professional.

Features

- Filtering system with Pre Filter & HEPA Filter
- Dimension: 2135(H) x 768(D) x 1310(L)
- Completely transparent front panel
- Chemical resistant gloves
- Glove size options
- Positive pressure
- Filter efficiency sensor
- Pre filter for added durability
- LED lighting for clear visibility
- Shelf for storage and trash bin.
- Swinging rear door with 180 opening angle
- Locking leveling casters
- Comes Fully assembled
- Indoor and outdoor operations.
